Activating All in One AI and getting your 100 welcome credits

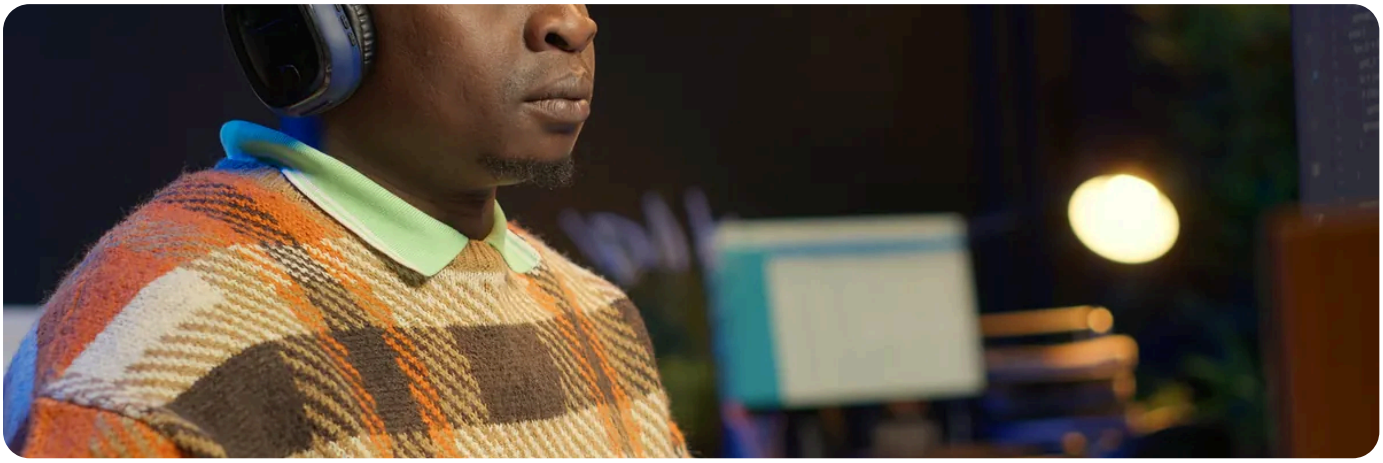
All in One AI Created on **November 26, 2026** 2 min read



In short: activating All in One AI is free and takes effect straight away. On the first activation you get **100 welcome credits**, once per account, to try the models.

If your account is new

There is nothing to do. When you open an account with Interweb, All in One AI is active from the start and the 100 credits are already there. You also get an email saying the account is active.

If you were already a client

1. Log in to Meu Interweb and open the **All in One AI** page.
2. On the "Activate All in One AI" card, click **Activate All in One AI**.
3. The 100 credits go into your credit balance and the page opens with its tabs: History, Buy credits, Models, Playground, Agents and Plan.

> **Profile not complete?**
> If something is missing from your profile, the page tells you what it is and the activation waits. Complete your profile in Meu Interweb and come back to the page.

Only the account owner can activate and use All in One AI. Other users on the account cannot use it.

What to do with the 100 credits

They cover several conversations and a few images, depending on the model. The Playground shows what each request will cost before you send it. Good first steps: **chat with a text model** and, if you are going to code, create a key in the **API Center** with the `ai:read` and `ai:write` permissions. See **creating a key**.

When the credits run out, buy more on the **Buy credits** tab. See **how the volume tiers work**.

RECOMMENDED

Not activated yet? Open the All in One AI page and click Activate.
