National extensions immediately say where your company is. Angola has several, each with an intended audience.

The Angolan extensions

Extension	Who it is for
.ao	Companies and projects in Angola. The main national extension.
.co.ao	An alternative aimed at commercial activity in the country.
.it.ao	The cheaper option, used mostly by technology projects.
.org.ao	Angolan organisations and associations.
.edu.ao	Education institutions in Angola.

Who runs these extensions

1

.ao - the national registry is **DNS.AO**, run by INFOSI, under Angola's Ministry of Telecommunications, Information Technology and Social Communication.

2

We handle the registration with that body on your behalf - see **who is who in a domain registration** for the roles.

Extensions with special requirements

Not all of them are open to everyone - and the paperwork required differs from one to the next:

1 **.edu.ao** - education institutions; proof of status may be requested.

2 **.org.ao** - meant for organisations and associations, not commercial activity.

3 **.gov.ao** and **.mil.ao** - state and military bodies; not registered by private parties.

If you request one of these, you may be asked for documents proving you qualify, and the review takes longer than an ordinary registration. If you do not qualify, use the commercial extension instead.

Registering more than one is common and cheap against the risk: it stops anyone else using your name on another extension, and they can all point to the same site.

Not sure whether you qualify for a restricted extension? Ask before paying.

DOMAIN REGISTRATION**Is the name you have in mind still free?**

Type it here and find out in a second. DNS management included in the panel, renewal notices well ahead of time, and the domain registered in your name - never in ours.
