Plesk is a hosting panel, like cPanel. It does the same job - files, e-mail, databases - with a different interface. And like cPanel, it **does not replace Meu Interweb**: they sit at different levels.

The three, side by side

	What it is for	Who uses it
Meu Interweb	Your account with us: invoices, services, domains, support tickets.	All of our clients.
cPanel	The hosting panel: files, e-mail, databases, backups.	It is the panel on our hosting plans.
Plesk	The same role as cPanel, different interface. Used on Windows hosting.	It is the panel on our Windows plans.

Which one is ours

It depends on the plan: on **Linux** plans the panel is **cPanel**; on **Windows** plans it is **Plesk**. So if you are used to Plesk you do not have to change habits - and neither do you if you come from cPanel.

In Plesk it is called...	In cPanel it is...	
File Manager	File Manager	The same, inside <i>public_html</i> .
Databases	MySQL Databases / phpMyAdmin	Create and administer databases.
Mail	Email Accounts	Create mailboxes, aliases and forwarders.
Domains > DNS	Zone Editor	The domain's A, MX and TXT records.
Backup Manager	JetBackup	Backups and restores.

If you are coming from a Plesk provider

1 The **site comes across**: files, database and e-mail migrate without trouble.

2 The **panel does not**. On our side a new cPanel is created and the content goes into it.

3 Anything relying on Windows-specific features has to be checked first - tell us what the site uses.

Do not work in both panels for the same site. While the migration runs, editing files on both sides guarantees one copy goes stale. Pick a side, and only switch once the new one is confirmed.

Meu Interweb stays the same. Whatever the technical panel, invoices, renewals and support tickets live in **Meu Interweb**. That does not change.

Coming from Plesk hosting? We will tell you what a migration needs.

RLX-LIMITES

In our plans

Our Windows plans, which use Plesk, have the same limits as the Linux plans with cPanel:

- Pro: 1 site, 10 GB SSD NVMe, 100 e-mails per hour.
- Plus: 6 sites, 20 GB SSD NVMe, 200 e-mails per hour.
- Ultra: unlimited sites, 30 GB SSD NVMe, 300 e-mails per hour.
- Business Pro, Plus and Ultra: unlimited sites, with 50, 100 and 200 GB SSD NVMe.
- In all of them traffic, e-mail accounts, databases and FTP accounts are unlimited, backups are automatic every day with free restores, and you can move up a plan without losing the site.

The panel you will use with us is cPanel - **Meu Interweb vs cPanel: which panel to use for what.**

The move happens without the site going offline: **How to migrate a site without downtime.**

WEB HOSTING

Looking for hosting that stays out of your way?

cPanel, a free SSL certificate, backups every night before dawn kept for a year, and support that answers in your language.
