Reselling cPanel or Plesk hosting with the Reseller Program: the plans, the discount and the API

Reselling & WHMCS Created on **November 26, 2026** 3 min read

The short answer: in the Reseller Program you can resell the same hosting plans we sell on our website, on **cPanel or Plesk**, with your Agence discount. You buy the plan, pay from your account credit and charge your client whatever you agree with them. There is a summary on the **hosting for resellers** page.

The plans you can resell

Family	Plans	Panel
Web Hosting	Pro, Plus and Ultra	cPanel or Plesk, on each account
Business Hosting	Business Pro, Plus and Ultra	cPanel or Plesk, on each account
Reseller Hosting	Reseller I, II and III, with 10, 30 or 60 accounts	WHM (cPanel) or Plesk for you, one account per client

You pick the panel when you buy, as an option on the plan itself. Plesk is the Windows hosting. If you are not sure which one your client's site needs, see **Linux or Windows hosting**. One rule worth knowing now: WordPress does not run on Plesk. For a WordPress site, choose cPanel.

How much discount you get

The hosting plans are our own, so the Agence discount applies in full: **10% with Agence Pro, 15% with Agence Plus and 20% with Agence Ultra**. Add-ons from other suppliers that you add to the hosting, such as paid SSL, get a smaller discount, because there is a minimum price. The final price always shows on the invoice before you pay.

You can combine the two.
Reseller Hosting is a plan; the Reseller Program is the discount you get on everything you buy. Buying Reseller Hosting inside the program gets you Reseller Hosting with your Agence discount.

How to join the program

1. **Complete your profile** in Meu Interweb.

2. **Make one credit deposit** of at least the minimum for the Agence you want. The amounts, in your account currency, are on the **Reseller Program** page. The deposit is not lost: it stays as credit to pay for your purchases.

3. **Apply** on the reseller page in Meu Interweb. Our team reviews it by hand, approves or declines it and replies by email. There is no monthly fee.

Buying and managing: in Meu Interweb or through the API

You can buy like any other client, in Meu Interweb, or from your own system through the API, always from credit. A purchase through the API opens the account just like a purchase in Meu Interweb. The steps are in **opening a hosting account through the API**.

After the purchase, on a cPanel account, the everyday work can also be done through the API: databases, subdomains and addon domains, cron jobs, SSL, PHP options, backups, FTP and mailboxes. See **hosting through the API**.

> **!** **On Plesk, you manage things in Plesk.**
> The API management operations only run on supported servers, and today those are the cPanel ones. On a Plesk account the answer is `409` with `server_not_supported`. Buying through the API works for both.

Who deals with your clients

Your clients deal with you and pay you. Interweb bills only you, with your Agence discount. On Reseller Hosting, each client has their own account, on cPanel or Plesk, and you manage them in WHM or Plesk. For your first steps in WHM, see **first steps as a reseller**.

RECOMMENDED

Want to resell hosting with your Agence discount? The page has the plans, the comparison and the button to apply.
