Checking your AI credit balance: the page, GET /v1/ai/balance and aio balance

AI Credits & Costs Created on **November 28, 2026** 2 min read

Your AI credit balance is shown in three places: on the All in One AI page, through the API and in the terminal, with the `aio` command. It is always the same number, with two decimal places. Checking it spends no credits.

On the page

The balance is at the top of the **All in One AI** page, on every tab, next to the button to buy more. People on your team with access see the same balance, because they spend the account balance.

Through the API

Use `GET /v1/ai/balance`, with a key that has the `ai:read` permission. On Linux and macOS:

```
curl "https://api.interweb.ao/v1/ai/balance" -H "Authorization: Bearer $INTERWEB_API_KEY"
```

In Windows PowerShell:

```
curl.exe "https://api.interweb.ao/v1/ai/balance" -H "Authorization: Bearer $env:INTERWEB_API_KEY"
```

The response, without a Coding Plan:

```
{
  "data": {
    "credits": 1250.5,
    "currency": "credits"
  }
}
```

Field	What it is
`credits`	The AI credits on the account, with two decimal places.
`currency`	Always `credits`. It is not your account currency.
`subscription`	Only with a Coding Plan: the points left this week and this month, when they come back and whether credits are used when the points run out.

The balance is the same with a `sandbox_` key and a `prod_` key. You can read it with your test key.

In the terminal

```
aio balance
```

It shows your credits and, with a Coding Plan, the points for the week and the month, the dates they come back and whether credits are used when the plan runs out. `aio auth status` also shows the balance, with the key in use, masked. See **how to install aio**.

AI credits are not your account balance.
The balance in Kz pays invoices. AI credits only pay for AI requests. See **credit balance in your account**.

You do not have to keep checking: when the balance runs low, the "AI Low Balance" email arrives. See **the emails All in One AI sends**.

RECOMMENDED

Want to see your balance now? Open All in One AI.
