Your Playground conversations: where to find them again

Playground & Text Models Created on **November 28, 2026** 2 min read

What you do in the Playground is saved under "Conversations", next to the chat (below it, on a phone). You can go back to a conversation, carry it on, rename it or delete it.

Where they are

Each **Playground** tab has its own list: Chat conversations stay in Chat, and Image, Video and Voice requests, with their results, stay on each of those tabs. Tests of an agent, with the Try it button, stay in that agent's test.

Searching and organising

You want to	How
Find a conversation	Type in the "Search the name and the text" box. In Show you choose 10, 25, 50, 100 or All.
Rename it	Click the pencil, type the name and press Enter. Esc cancels. Without a name it shows as "Untitled conversation".
Delete it	Click delete and confirm. This cannot be undone.
Start from scratch	Click **New conversation**.

Carrying on a conversation

Open the conversation in the list: the model and the messages come back and you can write the next one. Each new message carries the whole conversation, so a long conversation costs more with every answer. When the Playground says "The conversation is too long. Please start a new one.", open a new conversation.

What is not saved

With **Private mode: this conversation is not saved** on, the conversation does not stay in "Conversations" and creates no memory. The request still goes to the model and is charged. Files you upload in the Playground, such as the starting image of a video, are deleted after 24 hours. When you reopen an old conversation, you may see "One of

the files is no longer available. Please upload it again."

Download what you want to keep.
As with generations through the API, the links to generated files are not permanent. Video and voice have download buttons.

Each person on your team only sees their own conversations; the owner sees the account's. If you deactivate All in One AI, your conversations are kept. See **who can use All in One AI on your account**.

RECOMMENDED

Your conversations are in the All in One AI Playground.
